TECHNICAL SKILLS

Languages:	Go (Golang), Python, TypeScript, JavaScript, SQL, C++, Dart, Bash
Backend & Frameworks:	Node.js, Express.js, Angular, Next.js, FastAPI, React Native (Expo), Flutter, WebSockets
Cloud & DevOps:	Docker, Kubernetes, AWS (Neptune, OpenSearch, EC2), GCP, Terraform IaC, Ansible, CI/CD
Databases & Caching:	PostgreSQL, MongoDB, Redis, Qdrant Vector DB, Amazon Neptune (Graph)
AI & Quantitative:	Agentic Workflows (LangGraph, Tool Calling, RAG), Event Streaming (NATS JetStream), MetaTrader 5

FULL-TIME WORK EXPERIENCE

Software Engineer (Systems & Infrastructure) — Gym Wise India Private Limited Jul 2024 – Nov 2025 • On-site (Gurugram, India)

- Re-architected backend microservices from PHP Laravel to **Go (Golang)** with Redis caching and **Qdrant Vector DB** for member discovery and search.
- Developed 3 cross-platform mobile apps in **Flutter/Dart** (Customer, Partner with attendance, and Admin) plus a Next.js web portal, live on Google Play & App Store.
- Built and managed containerized cloud infrastructure on **AWS** and **GCP** using **Terraform IaC** and Ansible with Docker Swarm orchestration.
- Implemented gym marketplace booking workflows and dynamic pricing logic based on utilization patterns.

Full Stack Engineer — BigHit Nov 2022 – Mar 2024 • On-site (Mumbai, India)

- Built real-time **Socket.io Node.js server** powering dynamic chat for 2,000 Concurrent Active Users (~400 events/sec peak throughput).
- Engineered live score updates and match telemetry for live-streamed football matches, featuring an abstracted third-umpire web console with role-based access control.
- Migrated legacy relational SQL database to **Amazon Neptune graph DB (Gremlin)**, optimizing athlete-to-scout social graph traversal queries.
- Optimized mobile app bundle size (~80% reduction) and cloud services on AWS (OpenSearch and Neptune), reducing API latency under peak tournament load.

Full Stack Developer — Gamix Labs Mar 2022 – Oct 2022 • On-site (Noida, India)

- Engineered real-time game simulation backends in **Node.js** with **RabbitMQ** event streaming and Redis caching.
- Implemented and verified Return-to-Player (RTP) algorithms and win-frequency probability distributions using Monte Carlo simulations.
- Architected multi-database persistence layers across **MongoDB**, relational SQL, and Firebase Realtime/Firestore databases for client titles.

FREELANCE & CLIENT PROJECTS

Full Stack Software Engineer — NaiBooking Aug 2026 – Present • Remote (Bangalore, India)

- Architected full-stack salon and barber SaaS marketplace: web portal and admin console in **React / Next.js**, client and business mobile apps in **React Native (Expo)** live on app stores.
- Engineered Node.js backend using **MongoDB** and **PostgreSQL** with transaction ledgers, advisory locking, and multi-tier Redis caching for booking spikes.
- Configured AWS cloud infrastructure via **Terraform IaC** and integrated automated subscription billing via Razorpay.

Full Stack Engineer — GrowthHikes 2026 • Remote

- Engineered modern web platform and interactive client calculators using Next.js/React with Cloudflare Workers deployment.
- Automated agentic content workflows, analytics ingestion, and scheduled marketing operations pipelines.

PERSONAL & OPEN-SOURCE PROJECTS

Meeseeks — Autonomous Multi-Agent AI Platform Python • Go • LangGraph • Docker • FastAPI

- Built an autonomous multi-agent orchestration framework supporting tool-calling supervisor loops, vector-backed shared memory, and self-healing diagnostic routines.

Mitochondria & Zenith — Quantitative Telemetry & Execution Engine Go • Python • C++ • NATS JetStream • MetaTrader 5

- Engineered tick-level market data streaming and simulation backtesting pipelines with automated risk guardrails and MetaTrader 5 order execution.

EDUCATION

Bachelor of Science (B.Sc. Hons) in Computer Science — DDUC, University of Delhi 2018 – 2021 • New Delhi, India
