

SAHIL RATHEE

Senior Software Engineer & AI Architect

New Delhi, India • (+91) 9625213480 • sahil.artits.rathee@gmail.com • linkedin.com/in/rttss-sahil • github.com/rttss-sahil • leetcode.com/u/artits • artits.infortts.site

PROFESSIONAL SUMMARY

Senior Software Engineer & AI Architect with over **4 years of experience** architecting autonomous systems, distributed cloud infrastructure, and financial engineering engines. Proven record deploying agentic AI workflows and optimized RAG architectures that **reduced operational token expenditure by 70%**. Expert in full-stack high-performance distributed systems, sub-millisecond execution engines, container orchestration, and scaling high-concurrency cross-platform ecosystems across APAC and global markets.

TECHNICAL COMPETENCIES

Languages:	TypeScript, JavaScript, Python, Go (Golang), C++, Dart, Kotlin, GraphQL, Gremlin, SQL, HTML5/CSS3
Frameworks & Web:	React, Next.js (SSR/SSG), Angular, React Native, Flutter, Cocos Creator Engine, Node.js, Express, FastAPI
Cloud & DevOps:	Kubernetes, Docker, Podman, Terraform IaC, Ansible, Jenkins CI/CD, AWS (Lambda, ECS, Neptune, OpenSearch), GCP, Cloudflare Workers
Databases & Streaming:	PostgreSQL, MySQL, MongoDB, Redis, Qdrant Vector DB, AWS Neptune, NATS JetStream, RabbitMQ, Apache Kafka
Systems & Domains:	Agentic AI Swarms, RAG Pipeline Optimization, GIS & Geospatial Indexing, Quantitative Trading & Backtesting, Monorepo Architecture

PROFESSIONAL EXPERIENCE

Lead Software Engineer — Orealfit

Nov 2025 – Present | New Delhi, India

- Architected and scaled an enterprise sports ecosystem featuring **real-time scorecard streaming** and low-latency interactive advertising modules, significantly elevating user retention and backend throughput.
- Transitioned engineering operations to **autonomous agentic workflows** by deploying autonomous dev and test agent pipelines, accelerating end-to-end feature delivery velocity.
- Optimized RAG pipeline efficiency and AI infrastructure through custom token usage telemetry and caching, resulting in a **70% reduction in monthly AI token expenditure**.
- Engineered a high-performance wellness e-commerce platform using monorepo architecture, streamlining cross-service asset management and deployment reliability.
- Built an edge-computed billing and GST-compliance solution for SMBs, providing real-time financial tracking with sub-50ms latency.
- Architected an end-to-end multi-tenant property and tenant SaaS platform (Roost) with automated escrow orchestration and transaction reconciliation.

Tech Stack: *Flutter, Next.js, Go, C++, Node.js, PostgreSQL, Redis, Qdrant Vector DB, Supabase, Cloudflare Workers, Docker*

Solution Architect — Gym Wise India Private Limited — Mar 2024 – Nov 2025 | New Delhi & APAC

- Architected and led technical expansion for a global fitness operations platform serving **300+ gyms across Delhi NCR, Australia, and Singapore**.
- Spearheaded container orchestration and automated Infrastructure as Code (Terraform), achieving **99.99% high availability** across multi-region cloud deployments.
- Designed information system architecture and cross-regional data replication pipelines, optimizing data consistency and query performance.
- Aligned engineering execution with corporate growth targets, translating complex regional compliance rules into robust microservice contracts.

Tech Stack: *AWS, GCP, Kubernetes, Terraform IaC, Golang, Flutter, Docker Swarm, Play Console*

Full Stack Engineer — Bighit — Nov 2022 – Mar 2024 | New Delhi, India

- Spearheaded mobile & backend infrastructure modernization (React Native & AWS IaC), achieving an **~80% reduction in app bundle size** and a **~60% increase in server efficiency**.
- Pioneered the integration of **agentic AI workflows** (GitHub Copilot & Claude) into the development lifecycle, automating PR reviews and CI/CD pipelines to dramatically boost engineering velocity.
- Integrated and managed AWS cloud infrastructure with **Amazon Neptune** graph DB and **OpenSearch** clusters, reducing API response latency by **80%**.
- Designed GIS location tracking, real-time dynamic chat, and high-throughput push notification engines.
- Led and mentored a team of 6 engineers: ran technical roadmaps, sprint planning, code reviews, and developer onboarding.

Tech Stack: *TypeScript, React Native, Node.js, GraphQL, AWS Neptune, OpenSearch, Docker, Kubernetes, AWS IaC, CI/CD*

Full Stack Developer — Gamix Labs — Mar 2022 – Oct 2022 | Noida, India

- Collaborated with tier-1 international gaming clients (OneFC, Bombay Play) to deliver responsive PWA online gaming platforms and HTML5 titles.
- Engineered and deployed Facebook Instant Games (Vegas Slot Machines) utilizing the **Cocos Creator Game Engine** with administrative management dashboards.
- Built high-throughput Node.js game backends with event streaming, implementing a caching-first strategy (MongoDB & Redis) to maximize frame-rate stability and server throughput.
- Developed a cross-platform biometric facial and voice recognition verification app for online interview security.

Tech Stack: *TypeScript, Cocos Creator Engine, Angular, Node.js, Java, Kotlin, Flutter, Redis, RabbitMQ, MongoDB, GCP*

KEY ENGINEERING & OPEN-SOURCE INITIATIVES

Zenith & Mitochondria — Autonomous Forensic Trading Workstation — Infortts Open-Source Swarm

- Architected an autonomous quantitative trading engine integrated with MetaTrader 5, NLP market sentiment analysis, and vectorized trade analytics.
- Engineered sub-millisecond in-memory ring buffers and custom backtesting simulation engines streaming live telemetry via NATS JetStream to a Flutter workstation.

Tech Stack: *Python, C++, Go, NATS JetStream, PostgreSQL, Qdrant Vector DB, WebSockets, Flutter*

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science — DDUC, University of Delhi — 2018 – 2021 | New Delhi, India

INTERESTS & SPECIALIZATIONS

High-Frequency Trading (HFT) Architecture • Algorithmic Strategy & Quantitative Modeling • Distributed Multi-Agent Systems • Competitive Gaming (CS:GO, Chess)
